

### **The institution practices decentralization and participative management**

There are two categories of decentralization and participative management: academic management and administrative management.

**Academic:** Every academic department has a Board of Studies entrusted to review, restructure and revise the syllabi every three years. All faculty members take active participation by giving necessary inputs on the overall course structure and teaching-learning process in tune with the general standards and also keeping in view the local and regional context.

**Administrative:** The Board of Trustees (BOT) is the highest policy- making body in the governance of the college administration. The BOT meets twice a year. Within the college administration, the Administrative Council occupies the highest body where all matters related to the management of the college are deliberated upon and decided. Matters/issues are brought to the notice of the Administrative Council by the respective Heads in all the wings of the college – academic and administrative. Those issues that come within the purview of the policy-matters of the college are taken to the Board of Trustees by the Principal for further deliberation and decision. There are two Faculty Representatives in the BOT who represents the faculty.

The Governing Body of the institution comprises representatives from the BOT, UGC Nominee, University nominee, and Director of Higher Education (GON).

The management of the college is carried on with different committees formed to perform and execute varied responsibilities of the college. Being a residential college with 1000 acres of land, wide participation from the lowest rung to the highest echelon of office management is required. There are four annual general meetings (two in each semester) where all faculty and staff deliberate on issues related to overall management of the college.
